Terms of Agreement:
IMPORTANT: READ CAREFULLY BEFORE YOU INSTALL OR USE THE ACTIVEGANTT SCHEDULER COMPONENT: This End User License Agreement ("EULA") is a legal agreement between You ("You" and "Your" includes a person and/or an individual entity) and The Source Code Store LLC ("SCS"). The ActiveGantt Scheduler Component ("Component") includes the object code, the associated media, any printed materials, any updates, and any "online" or electronic documentation, as applicable. By accessing, installing, copying or otherwise using the ActiveGantt Scheduler Component, You agree to be bound by the terms of this EULA. If you do not agree to the terms of this EULA, SCS is unwilling to license the Software to you. In such an event, You may not access, use or copy the ActiveGantt Scheduler Component. WRITTEN ASSENT IS NOT A PREREQUISITE TO THE VALIDITY OR ENFORCEABILITY OF THIS EULA.

Grant of License:
Subject to the terms and conditions of this agreement and payment of all applicable fees SCS grants you a non-exclusive right to use the component. SCS also grants You the right to integrate the component into Your end products. You may not subclass the Component into another Component that extends ActiveGantt's functionality. The duration of Your license is perpetual.

Updates/Upgrades Subscription Period:
Only for the duration of the subscription period You will be eligible to receive all major and minor updates for the Component that You have licensed.

Subscription Period Renewals:
You may purchase additional subscription periods as long as they are purchased before, or at a maximum of thirty (30) days after the subscription period has expired.

Support:
Depending on the type of license You have purchased you are entitled to: 5 support incidents within a year's time frame with a 48 hour response time, or 25 support incidents within a year's time frame with a 24 hour response time, or 50 support incidents within a year's time frame with a 24 hour response time. Our regular support services include answering questions about the existing functionality of our component, small code snippets, general suggestions and expedited bug fixing. Regular support requires competency in the technology and development environment being used (C#, C++, VB.Net, VB6, VBA and ActiveX, MFC, Windows Forms, WPF, Silverlight or JQuery).
